MONTHLY REPORT

PAR 213
7 Aug 64

SUBJECT: Color Reproduction Systems Review

TASK/PROBLEM

1. In view of the recent importance attached to color photography by the intelligence community, investigate and determine the most suitable means to reproduce and utilize multiple copies of color material. Determine the most suitable reproduction system and types of equipment to be used in all phases of the reproduction cycle. Also, attempt to define how color photography can best be utilized by the photo interpreter.

DISCUSSION

2. Briefing aids are being designed for group presentation in both briefing board and projection transparency/slide formats.

3. Demonstration material which includes reproduction of high altitude scenes are being withheld from briefing aids pending receipt of satisfactorily exposed acquisition materials.

PLANNED ACTIVITIES

4. Briefing boards and slides will be prepared upon receipt of the suitable high altitude color acquisition.

5. Evaluation of working copies (duplicates) will be done as soon as possible to define the best color reproduction systems. This also is dependent upon suitable high altitude acquisition.
